

LAW MAX

Legal Affairs Management Program

برنامج إدارة الشؤون القانونية

About the Program

"Law Max" is a sophisticated software designed for legal affairs management. Its purpose is to streamline and enhance the handling of legal aspects within both law offices and the legal departments of corporations. The software is tailored to comply with general court-related requirements and procedures, and specifically addresses the operational management of offices, encompassing both financial and administrative aspects.

The Software "Law Max" encompasses an extensive array of modules, tools, and functionalities. These include managing cases and sessions, tracking and organizing litigation files, handling documents, undertaking administrative tasks, issuing legal authorizations, among other features.

One of the key strengths of this program is its integration of cutting-edge information technology and artificial intelligence. It also adheres to the latest standards in cybersecurity, which aids in boosting operational efficiency, minimizing errors, and accelerating the process of making crucial administrative decisions. This is facilitated by a dedicated dashboard for each module.

"Law Max" is a creation of Inova Wide for Smart Solutions, a leading company in the legal technology sector. This company has invested its expertise and resources to advance this field."

A person in a dark suit and striped tie is shown from the chest up, holding a glowing, translucent orb in their right hand. The orb contains various legal and business icons, including a classical building, scales of justice, a handshake, a document, and a smartphone. The background is a blurred office setting with a desk and books.

Who Benefits from LawMax

A variety of entities benefit from "Law Max" legal affairs management program, including:

- Law firms
- Legal departments in corporations
- Legal departments in insurance companies
- Legal departments in banks
- Legal departments in commercial complexes
- Legal departments in sports clubs

We are dedicated to leading the way in fully utilizing our resources and abilities to incorporate technology within the legal sector, recognizing the current shortfall in technological integration in this area.

- Establishing solid partnerships with our diverse clientele, ranging from law firms to legal departments across various industries.
- Creating a powerful, interactive software that addresses the increasing needs of the market, aiming to be the primary system for managing legal institutional resources.
- Broadening our reach across different legal sectors, ensuring the provision of exceptional and unique services that align with the expectations of our clients.

Our Goals

At 'Law Max', our vision is to bring a transformative change in the management of legal procedures. Our strategy involves the fusion of state-of-the-art technology and artificial intelligence with legal datasets, aiming to empower both organizations and businesses to enhance their service quality. We are dedicated to optimizing case and document management, making administrative operations more efficient, and ensuring effective tracking of appointments and notifications, among other functionalities and services. Our ultimate goal is to initiate a substantial shift in the legal domain, by developing an innovative technological platform that aids in strategic decision-making and promotes better communication between Software users and their clients.

The Dashboard Module

The Dashboard module is designed to provide a dynamic interface that allows upper management and legal teams to customize the presentation and content based on their specific needs and assigned permissions. This module is instrumental in delivering accurate strategic insights, achieved through the aggregation and analysis of legal, administrative, and financial data. It also facilitates the tracking and monitoring of case developments and hearings, and produces precisely founded reports that aid in making well-informed decisions.

With its interface customization capabilities, users can choose the specific information and data that best align with their unique requirements and goals.

Users gain access to a diverse range of metrics and statistics pertinent to legal, administrative, and financial aspects.

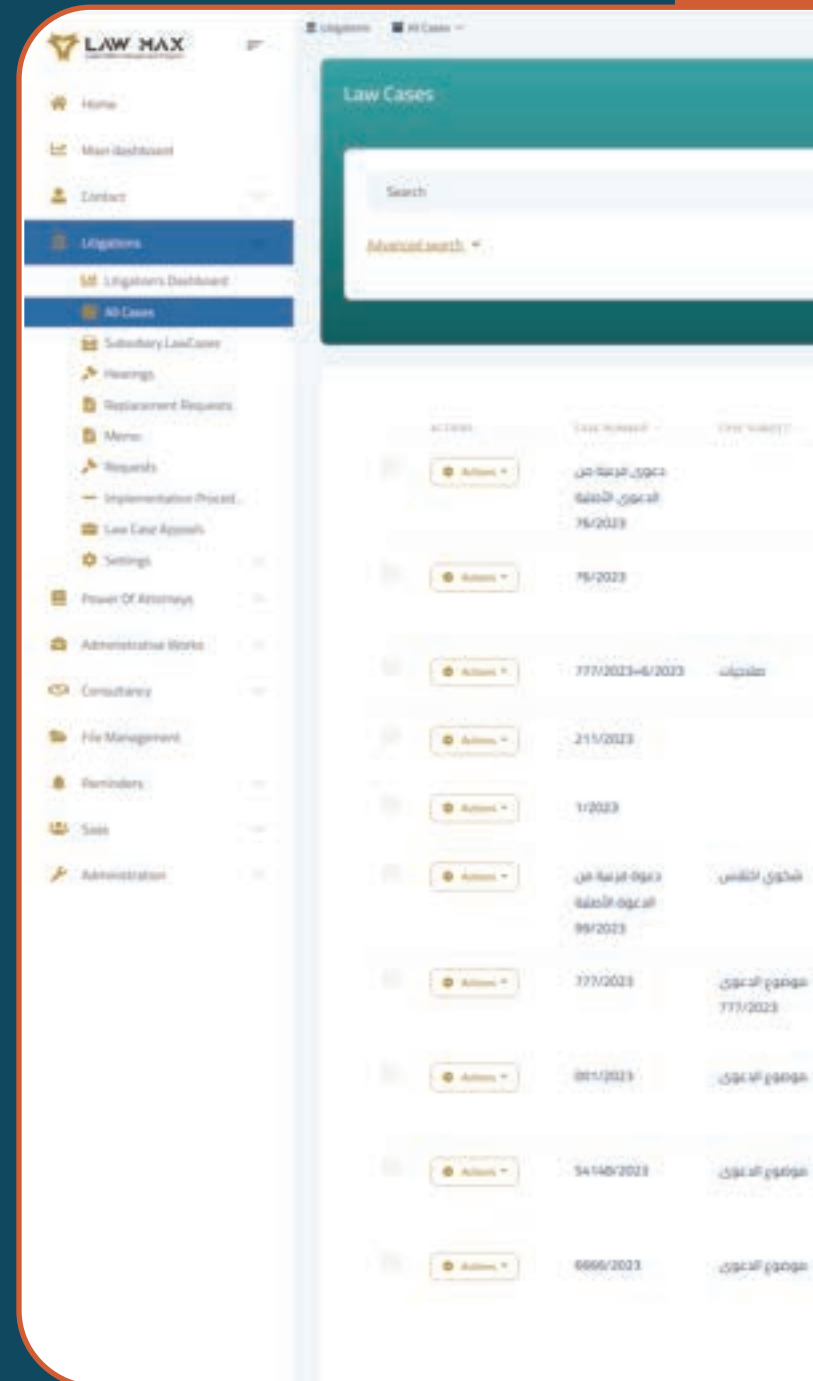

The Litigation Module

The Litigation Module stands as a crucial component in the suite of specialized legal management systems. Its primary function is to streamline and enhance the monitoring of legal cases. This module is designed to offer a holistic framework that facilitates efficient tracking and organization of diverse legal cases, as well as managing their associated procedures. Lawyers and legal teams can utilize this module to seamlessly record intricate details of cases, schedule sessions, draft memos and handle administrative tasks, as well as accurately incorporate relevant documents.

In addition, this module plays a pivotal role in improving coordination among all users of the program, providing an overarching perspective on the progression and various phases of legal cases. This results in more effective workload management and maximizes the use of available resources. Through its capability to generate precise and detailed reports on case statuses and developments, the Litigation Module is instrumental in aiding strategic, well-informed decision-making grounded in factual and legal foundations.

The implementation of the Litigation Module leads to significant enhancements in case management, thereby positively impacting the overall efficiency of a legal office or department. It aids in substantial time and resource management savings. Moreover, the module significantly contributes to strict adherence to legal timelines and bolsters teamwork and cooperation among members through timely alerts and notifications that encompass all the program's processes and activities. These interactions consequently boost the quality of case handling and improve the effectiveness of the outcomes.

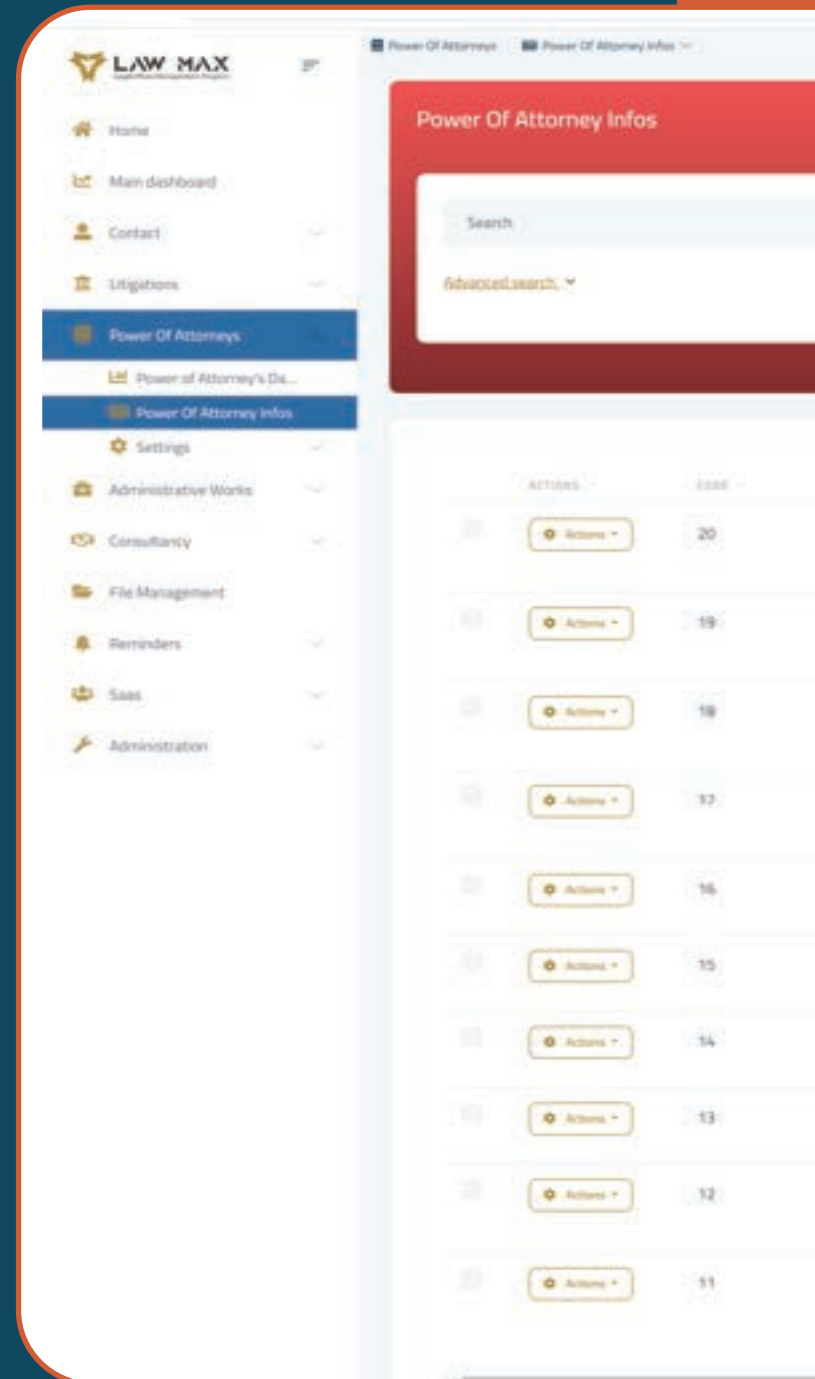

The top screenshot displays the 'Litigation Dashboard' in the Law Nite software. It features a sidebar with navigation options like 'Home', 'New Litigation', 'Litigation', 'Case Management', 'Reporting', 'Settings', and 'Help'. The main dashboard includes a 'Litigation' section with five cards showing counts for 'Total Cases' (30), 'Closed Cases' (4), 'Bidding Cases' (2), 'Newly Filed Cases' (0), and 'Cases Reserved for Litigation' (4). Below these are two charts: a 'New Cases' line graph and a 'By Case Status' donut chart. The bottom section contains three smaller donut charts for 'Litigation', 'Bidding', and 'Closed' statuses, each with a legend for 'Case', 'Case Management', 'Case Reserved', 'Case Reserved for Litigation', 'Case Reserved for Litigation', 'Case Reserved for Litigation', and 'Case Reserved for Litigation'.

The bottom screenshot shows the 'New Law Case' form. It includes a sidebar with navigation options like 'Home', 'New Litigation', 'Litigation', 'Case Management', 'Reporting', 'Settings', and 'Help'. The main form has a 'Case Details' section with fields for 'Case Name', 'Case Number', 'Case Type', 'Case Status', and 'Case Category'. Below this is a 'Case Management' section with fields for 'Case Manager', 'Case Manager Email', 'Case Manager Phone', 'Case Manager Address', and 'Case Manager City'. The bottom section contains a 'Case Reserved' section with fields for 'Case Reserved', 'Case Reserved Email', 'Case Reserved Phone', 'Case Reserved Address', and 'Case Reserved City'.

Power of Attorney Module

The Powers of Attorney Module is an essential component of the legal management software suite, primarily for its capability to effortlessly incorporate and provide access to all powers of attorney, regardless of time and location. Moreover, it plays a vital role in notifying users about the expiration of powers of attorney, aiming to prevent the potential rejection of legal filings in court due to lapsed agency terms.

Furthermore, this module offers the functionality to identify whether powers of attorney are currently valid, expired, or have been cancelled, either by the legal office or the client. These unique features significantly enhance the office's efficiency, ease interactions with clients, and help in retaining them.

The screenshot displays the LORPASS system interface for creating a new Power of Attorney. The sidebar on the left contains navigation links: Home, My appointments, My notes, My messages, My power of attorney info (highlighted), My settings, My appointments calendar, My calendar, My messages calendar, My notes, and My appointments. The main content area is titled 'New Power Of Attorney Info'. It features two panels. The left panel, 'Information of Power of Attorney', includes a 'Title' dropdown, a 'Power of Attorney Type' dropdown, a 'Notarization Required?' dropdown, a 'Group ID' dropdown, and an 'Apply ID' dropdown. Below these are 'Date' and 'Time' fields, and a 'Notes' text area. The right panel, 'Information of Power of Attorney Details', includes a 'Start Date' dropdown and a 'Status' dropdown with buttons for 'Yes', 'No', and 'Cancel'. At the bottom, there is a 'Save' button and a 'Cancel' button.

The Legal Consultations Module

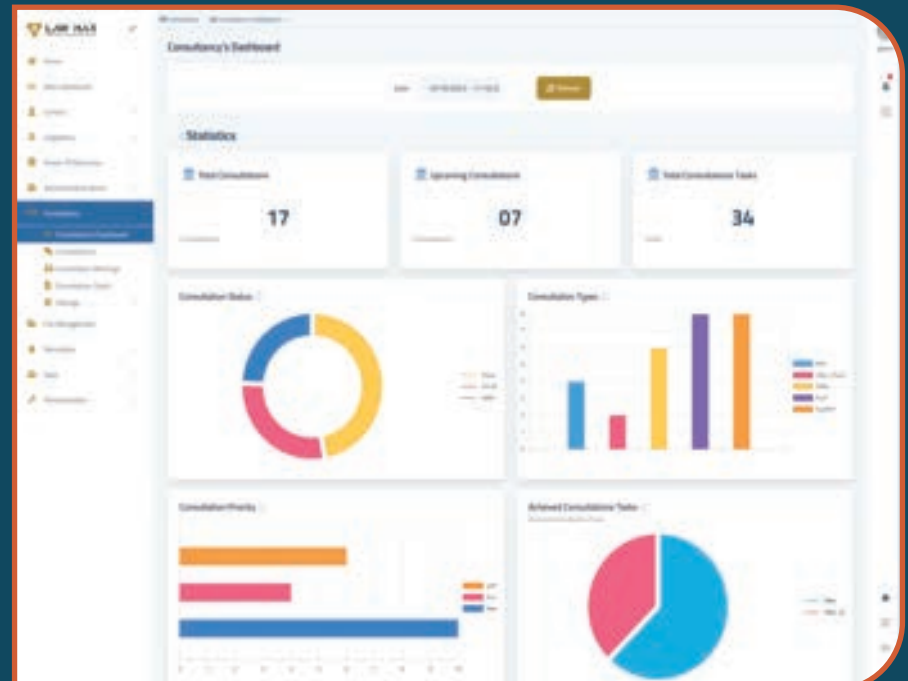

The legal consultations module forms a critical component within legal management systems, crafted to streamline and enhance the delivery of trustworthy legal advice and consultations to clients. This module empowers lawyers and legal teams to develop thorough legal consultations. It enables the recording and archiving of consultation details within the system, making it a reliable legal resource for future advisory needs.

Moreover, this module offers the functionality to generate detailed reports that encapsulate all aspects of the consultations rendered. It simplifies the process of transforming these consultations into actual legal cases, eliminating the need to re-enter client or adversary data related to the consultation.

In addition, the Advisory Services module significantly improves the quality of client services by offering precise and current legal advice and guidance.

The Administrative Operations Module

The module for Administrative Operations is tailored to ease and advance all activities related to the software's end-users. This module's goal is to deliver a suite of integrated solutions that streamline administrative tasks, whether they are general or specifically related to legal cases and issues.

In this module, legal professionals and teams have the capability to log, oversee, and manage both routine administrative duties and case-specific tasks. It enables the assignment and scheduling of administrative responsibilities, as well as the control and monitoring of relevant documents and reports.

Moreover, this module significantly enhances the integration of legal procedures with standard administrative tasks, which leads to improved coordination and a boost in operational efficiency.

Focused on better time management and effective resource utilization, the module excels in providing detailed, comprehensive reports of all administrative activities, both completed and pending. The importance and impact of the module for Administrative Operations are distinctly evident in its contribution to the efficient management of legal affairs, achieving desired performance, and accurately meeting set objectives.

The screenshot shows the LMS interface with a sidebar on the left containing navigation links. The main area is titled 'New To Do' and features a 'My To Do' list. The list has three columns: 'To Do Item', 'Due Date', and 'Status'. There are two rows of data. The first row shows 'My To Do Item 1' with a due date of '2023-10-10' and a status of 'Not Started'. The second row shows 'My To Do Item 2' with a due date of '2023-10-10' and a status of 'Not Started'. At the bottom, there is a 'My To Do' summary section with a 'Total' of 2 items and a 'View All' button.

Settings and Permissions Module

The Settings and Permissions module allows for comprehensive control over the program's various options, including configuring report settings, customizing interfaces, and assigning permissions. This module is equipped with a multitude of carefully defined rules and permissions. These can be allocated to users either automatically, based on the predefined administrative hierarchy, or manually through the feature that allows for customization and adjustment of user permissions by the program's administrator.

Hosting

Microsoft Azure Cloud

A comprehensive cloud platform offering a range of services including Infrastructure as a Service (IAAS), Platform as a Service (PAAS), and Software as a Service (SAAS), crucial for our service-oriented programs. The platform provides various services like analytics, storage, security, and backup.

Unique Advantages of Microsoft Azure

- Exceptional reliability, achieving up to %99.95 uptime.
- Available technical support and assistance at all times.
- Global datacenter presence, including in Qatar, ensuring synchronous geographical data access.
- Cost-effective, with a pay-as-you-go model.
- Scalable to align with company needs and growth.
- Compatible with almost any operating system, language, tool, or framework.
- High-level security against cyber threats.
- Backup capabilities in multiple countries for data safety.

Programming Languages

C#

A set of operational principles and processes aiding software development teams in delivering reliable, high-quality code and business requirement changes. It streamlines system development, monitoring, and continuous testing to eliminate errors and maintain software quality.

Features

- Type Safety.
- Object-Oriented.
- Platform Independence.
- NET Framework and .NET Core/.NET 5+
- Versatility.
- Strong Development Ecosystem.
- Memory Management.
- Security.

Updates, Integration, and Deployment Strategy

Continuous Integration / Continuous Deployment – CI/CD

A set of operational principles and processes aiding software development teams in delivering reliable, high-quality code and business requirement changes. It streamlines system development, monitoring, and continuous testing to eliminate errors and maintain software quality.

Benefits of Continuous Integration

- Automates software testing.
- Ensures the delivery of high-quality software to users.
- Quickly identifies and rectifies system quality issues.
- Reduces the costs associated with testing procedures.

Benefits of Continuous Deployment

- Automates repetitive tasks, allowing focus on effective testing.
- Creates a seamless workflow with specialized tools and technologies.
- Integrates teams and processes into a cohesive workflow.
- Boosts the overall productivity of the system or application.
- Accelerates the development process.

SMS/Mailing Services

SMS by Ooredoo

Seamless integration of Ooredoo's SMS service enhances communication efficiency, ensuring timely notifications and updates for law firms within the ERP system.

Microsoft Exchange Server

Facilitating robust email communication and collaboration, Microsoft Exchange Server streamlines information sharing and calendaring, fostering productivity within the law firm's ERP ecosystem

2FA (Two-Factor Authentication)

Elevate security protocols by implementing Two-Factor Authentication, bolstering access control and safeguarding sensitive legal data within the ERP system.

Log Block

Utilize Log Block technology to enhance data integrity and traceability, providing a secure and transparent audit trail for all transactions and activities within the ERP system for law firms

Features of the Software

1-Cloud Based Storage: Provides data storage solutions using Azure cloud services.

2-Secure Data Storage: Ensures data and sensitive information are protected with Microsoft Azure's sophisticated security measures.

3-Load Balancing by Microsoft Azure: Distributes workloads evenly across multiple servers or computing resources for optimal performance.

4-Data Backup Solutions: Implements and manages data backups for maintaining data safety.

5-Document Management System: Manages the storage and handling of documents efficiently.

6-Task Monitoring: Tracks the progress and management of various tasks within the software.

7-Comprehensive Calendar: An integrated calendar to keep track of important dates and events.

8-Court Session Tracking: Monitors court session progress, noting down decisions and developments.

9-Case Notification System: Sends timely alerts for specific milestones in the case's progress.

Features of the Software

10-Data Access Management: Controls user access to information based on their assigned roles.

11-Multilingual Capability: Supports multiple languages for data entry and display.

12-Performance Reporting: Creates regular analytical reports to evaluate office efficiency.

13-Mobile Device Compatibility: Offers a seamless experience across smartphones and tablets.

14-Customizable Interface: Provides options for tailoring the system to meet specific client requirements.

15-Ongoing Development: Dedicated to continuous improvement to meet evolving user needs and market trends.

16-Technical Support: High-quality, ongoing support to resolve issues and provide assistance.

17-User Training: Offers training sessions to ensure users get the most out of the system.
